PUBLIC HEALTH REPORTS.

VOL. XXV.

OCTOBER 28, 1910.

No. 43.

POLIOMYELITIS IN THE UNITED STATES.

In continuation of the information relative to the prevalence of poliomyelitis in the United States, published in the Public Health Reports of September 30, 1910, the following has been received:

CALIFORNIA.

During September, 1910, 13 cases of poliomyelitis were reported in California, as follows: Berkeley, 6; San Francisco, 5; Stockton, San Joaquin County, 1; Trenton, Sonoma County, 1. (California State Board of Health.)

COLORADO.

During September, 1910, 4 cases of poliomyelitis were reported in Colorado as follows: Kit Carson County, 1; Otero County, 3. (Secretary Colorado State Board of Health.)

CONNECTICUT.

During August 36 cases were reported as follows: Bethel, 1; Bridgeport, 4; Clinton, 1; Danbury (city), 2; Easton, 1; Enfield, 3; Groton (borough), 1; Guilford, 1; Haddam, 1; Hartford, 6; Meriden (city), 6; Meriden (town), 1; Plainfield, 2; Plymouth, 1; Suffield, 3; Waterbury, 2. Total, 36 cases in 16 towns.

During September cases were reported from every county except Litchfield, 71 cases in all being reported. (Secretary Connecticut State Board of Health.)

FLORIDA.

The state health officer reports that in August and September, 1907, at Live Oak, in Suwanee County, there were 16 cases of poliomyelitis with 1 death; in September, 1907, at the insane hospital at Chattahoochee, Gadsden County, there were 2 cases in adult males; in September, 1910, there were 2 cases in Duval County and 2 cases in Putnam County.

ILLINOIS.

During August 15 cases were reported from the following places: Hamilton, Hancock County; Plainville, Adams County; Balcom, Union County; Glenview, Cook County; Rock Island, Rock Island County. (Secretary Illinois State Board of Health.)

INDIANA.

The secretary of the state board of health reports that the following deaths from poliomyelitis have been recorded in Indiana: In 1909, 20 deaths. In 1910, 3 deaths in January, 4 in February, 2 in March, 1 in April, 3 in May, 1 in June, and 3 in July. He also states that the disease is not at present a reportable one in the State, but that it will probably be made so, and invites attention to the need of physicians informing themselves in regard to the differential diagnosis of poliomyelitis, 4 deaths reported in Indiana as due to this disease having been in reality tuberculous meningitis.

IOWA.

Occasional cases of infantile or spinal paralysis have been noted in Iowa for years, but only during the last year has it assumed any great importance. During 1909 15 deaths were reported as due to this disease. In April, 1910, a few cases appeared at Mason City, Cerro Gordo County, where in May and June a well-marked epidemic developed. During the present year cases and deaths have been reported as follows: One death in February, 1 in March, 1 in April, 1 in May, 18 cases and 1 death in June, and 49 cases and 6 deaths in July. From January 1 to August 24, 1910, a total of 186 cases, with 29 deaths, was reported from 47 counties. (Secretary State Board of Health and Iowa Health Bulletin, Vol. XXIV, No. 1.)

KANSAS.

During July, August, and September, 1910, 144 cases of poliomyelitis, with 34 deaths, were reported from 37 counties. (Secretary Kansas State Board of Health.)

MARYLAND.

During August, 1910, 3 cases of poliomyelitis and 10 deaths were reported from Montgomery and Prince George counties. (State Department of Health.)

MASSACHUSETTS.

During August approximately 118 cases of poliomyelitis were reported from the following localities: Agawam, Amherst, Arlington, Barnstable, Blandford, Boston, Bridgewater, Brockton, Cambridge, Chicopee, Dartmouth, Deerfield, Fall River, Fitchburg, Goshen, Hadley, Holyoke, Ipswich, Lawrence, Leominster, Lynn, Manchester, Milford, Monson, Needham, New Bedford, Newton, Northampton, Palmer, Quincy, Rockport, Southampton, Springfield, Taunton, Watertown, West Springfield, Westfield, Weston, Westport, and Worcester. During September there were approximately 114 cases reported from the following places: Amesbury, Attleboro, Bedford, Boston, Chicopee, Conway, Danvers, Deerfield, Douglas, East Longmeadow, Easthampton, Everett, Fall River, Fitchburg, Greenfield, Hardwick, Holland, Holyoke, Kingston, Lawrence, Lowell, Ludlow, Lunenburg, Lynn, Manchester, Medford, Middleboro, Monson, New Bedford, Newton, North Attleboro, Northampton, North-

field, Palmer, Pittsfield, Plymouth, Quincy, Russell, Rutland, Somerville, Southbridge, Springfield, Stockbridge, Swansea, Taunton, Townsend, Upton, Uxbridge, Waltham, Warren, Wellesley, Westfield, Westport, Westwood, Williamsburg, Winthrop, and Worcester. (Secretary Massachusetts State Board of Health.)

MICHIGAN.

The first cases of poliomyelitis to come directly under the observation of the state department of health were reported during August, 1910. The cases occurred in Hillsdale County, 5 in the village of Camden and 2 in Reading Township. The disease was first reported as meningitis, but a representative of the state board of health ascertained the condition to be poliomyelitis. Four of the cases were taken ill in July.

During September 10 cases with 4 deaths were reported from the following places: Coldwater; Sebawaing; Sherwood; Ingersoll Township, Midland County; Sherman Township, Newaygo County; White Pigeon; White Pigeon Township, St. Joseph County. (Secretary Michigan State Board of Health.)

NEBRASKA.

Dr. H. M. McClanahan, in an article on the Nebraska epidemic of poliomyelitis in 1909, refers to 999 cases reported from 18 counties. (Jour. Am. Med. Assn., Oct. 1, 1910, p. 1160.)

NEW JERSEY.

At a meeting of the board of health of the State of New Jersey, held on August 30, 1910, the following resolution was adopted:

Resolved, That in accordance with the power conferred upon the state board of health by the provisions of section 1 of chapter 260 of the laws of 1895, anterior poliomyelitis or infantile paralysis is hereby added to the list of diseases which shall hereafter be reported by physicians to local boards of health, in accordance with the provisions of said act.

NORTH DAKOTA.

During August 29 cases of poliomyelitis were reported from the following counties: Billings, 1; Burleigh, 9; Grand Forks, 1; Hettinger, 3; Logan, 2; McKenzie, 1; Sargent, 5; Stark, 2; Stutsman, 5; and during September 38 cases from the following counties: Grand Forks, 4; Dunn, 9; Griggs, 2; Lamoure, 3; Logan, 3; Wells, 17. (Secretary North Dakota State Board of Health.)

OKLAHOMA.

During August 5 cases of poliomyelitis with 4 deaths were reported from the following counties: Craig, 1; Beaver, 1; Roger, 1; Woodward, 2. (State Commissioner of Health.)

SOUTH DAKOTA.

During August 15 cases of poliomyelitis with 1 death were reported from the following counties: Brookings, 2; Grant, 4; Hughes, 1; Kingsbury, 4; Minnehaha, 2; Moody, 1; Walworth, 1. (State Superintendent of Health.)

VIRGINIA.

Up to October 12, 326 cases of poliomyelitis had been reported as occurring in Virginia since January 1, 1910. The disease was reported from many counties and showed a wide distribution. (Virginia State Commissioner of Health.)

WASHINGTON.

During August, 1910, 103 cases of poliomyelitis with 15 deaths were reported from the following counties: King, 41; Spokane, 9; Whatcom, 9; Okanogan, 7; Skagit, 4; Yakima, 4; Whitman, 3; Adams, 3; Grant (?), 3; Lincoln, 4; Asotin, 2; Kitsap, 2; Lewis, 2; Snohomish, 2; Wallawalla, 2; Thurston, 1; Pierce, 2; Kittitas, 1; Clarke, 1; Clallam, 1. (State Board of Health.)

PREVENTION OF CHOLERA.

SURVEILLANCE OVER IMMIGRANTS TO DESTINATION.

The following letter and its inclosure, addressed to the several state boards of health, is descriptive of a plan adopted to keep surveillance over immigrants from cholera-infected countries at their points of destination in the United States:

OCTOBER 23, 1910.

SIR: The inclosed immigrant destination card indicates a plan for keeping surveillance over immigrants from cholera-infected countries arriving in your State.

It will aid in the detection of a chance cholera bacillus carrier, and will call attention to the necessity of investigating suspicious illness among arrived immigrants, or those associating with them.

Timely opportunity will thus be given for precautionary isolation and disinfection while investigation of the case is being made, and for prompt preventive measures should the case prove to be of the suspected character. The "destination card" will be filled out by the immigration inspectors and forwarded to you by the medical officers at the immigration stations; and the plan, which it is hoped will receive your cooperation, contemplates your forwarding the cards to the health officers of the localities indicated thereon.

They will be sent first from Ellis Island, N. Y., and shortly thereafter from the other ports as soon as the arrangements can be perfected.

Despite the quarantine restraints at foreign and domestic ports, this surveillance is considered necessary as an additional measure.

Your attention is invited to the inclosed public health reports of October 21, 1910, containing an account of the recent detection of a baccillus carrier at the New York quarantine.

Respectfully,

WALTER WYMAN,
Surgeon-General.

Immigrant destination card.

[REVERSE.]

TREASURY DEPARTMENT, WASHINGTON, D. C.

On information received from the Commissioner of Immigration, this card is sent to the state boards of health that they may be informed of immigrants coming into the States from countries in which at the present time cholera is prevalent, whether generally prevalent or only in certain districts. The person named on the reverse has been subject to the quarantine regulations at foreign ports, the quarantine inspection at the domestic port, and also the subsequent immigration examination. Notwithstanding these precautions, it is advisable to exercise surveillance over arrived immigrants from the cholera-infected countries as named on the reverse, and to this end it is suggested that this card be sent to the local health officer at the point of destination, so that he may examine into any case of sudden or fatal gastro-enteritis or diarrhea among immigrants to determine its actual nature, and if any doubt exists, to report to the State Board of Health or to the Public Health and Marine-Hospital Service at Washington. This card should not be confounded with the information required by paragraph 67, United States Quarantine Regulations, promulgated October 20, 1910, relating to immigrants who have arrived on a vessel on which infection has appeared and whose destination after quarantine detention and disinfection would be sent by telegraph or mail.

SURGEON-GENERAL,

U. S. Public Health and Marine-Hospital Service.

UNITED STATES.

REPORTS TO THE SURGEON-GENERAL, PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

PLAGUE-PREVENTION WORK.

Surgeon Blue reports:

ANIMALS EXAMINED FOR PLAGUE INFECTION.

During the week ended October 8, 1910, there were examined for plague infection at the federal laboratory at San Francisco and the branch laboratories at Oakland and Los Angeles, Cal., animals as follows: Squirrels 3,082, rabbits 16, gophers 1, rats 2,036. The rats were identified as follows: *Mus norvegicus* 1,576, *Mus rattus* 108, *Mus alexandrinus* 310, *Mus musculus* 42.

The total number of animals examined was 5,135. No plague-infected animals were found.

DISTRIBUTION OF POISON.

In connection with the making of a squirrel-free zone around the cities on San Francisco Bay, 700 acres of land in Contra Costa County, 8 in Merced County, and 340 in San Mateo County were covered with poison during the week ended October 8, 1910.

SEATTLE, WASH.

Assistant Surgeon Chapin reports:

During the week ended October 8, 1910, 881 rats were collected. Of these 756 were necropsied and examined for plague infection. No plague-infected rats were found.

Investigation as to Prevalence of Ground Squirrels.

Doctor Blue further reports, October 17:

An investigation has been made in the past month as to the prevalence of ground squirrels on the borders of Arizona and Nevada. The following places, selected on account of being accessible to the railroads, were investigated and found to be free from squirrel infestation:

The Needles, San Bernardino County, Cal., on both sides of the Colorado River; Calada, San Bernardino County, Cal.; Las Vegas and Jean, Nev.

As a result of actual observations the hunters report that there are no squirrels in or near these towns. Prominent residents state that squirrels have never been encountered in those sections.

The same observation has been made at Daggett, a town on the Santa Fe Railroad in San Bernardino County.

The investigation of southern borders has been held in reserve for the winter season.

SMALLPOX IN THE UNITED STATES.

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES OF THE UNITED STATES (untabulated).

COLORADO—Denver.—Month of September, 1910. Population, 153,522. Total number of deaths from all causes 268, including typhoid fever 6, scarlet fever 2, diphtheria 2, tuberculosis 60. Cases reported: Typhoid fever 168, smallpox 18, measles 6, scarlet fever 26, diphtheria 36.

CONNECTICUT.—Month of September, 1910. Population, 1,077,102. Total number of deaths from all causes 1,380, including typhoid fever 24, measles 1, scarlet fever 5, diphtheria 16, tuberculosis (pulmonary), 120. Cases reported: Typhoid fever 244 in 56 towns, measles 24 in 13 towns, scarlet fever 85 in 29 towns, diphtheria 168 in 44 towns, tuberculosis 120 in 40 towns.

FLORIDA—Pensacola.—Month of September, 1910. Population, 35,000. Total number of deaths from all causes 49, including typhoid fever 8, tuberculosis 2.

GEORGIA—Macon.—Month of September, 1910. Population, 45,000—white 25,000, colored 20,000. Total number of deaths from all causes 49—white 22, colored 27, including typhoid fever 1, tuberculosis 3—white 1, colored 2.

ILLINOIS—*Quincy*.—Month of September, 1910. Population, 43,000. Total number of deaths from all causes 46, including tuberculosis 5. Cases reported: Typhoid fever 2, diphtheria 2.

INDIANA.—Month of August, 1910. Population, 2,732,550. Total number of deaths from all causes 3,234, including typhoid fever 123, diphtheria 23, tuberculosis 329. Cases reported: Typhoid fever 446 in 74 counties, smallpox 6 in 3 counties, diphtheria 193 in 34 counties.

IOWA—*Cedar Rapids*.—Month of September, 1910. Population, 35,000. Total number of deaths from all causes 46, including typhoid fever 3, tuberculosis 4. Cases reported: Scarlet fever 1, diphtheria 3.

KANSAS.—Month of August, 1910. Population, 1,703,002. Total number of deaths from all causes not reported. Forty deaths from typhoid fever, 1 death from smallpox, 1 death from measles, 5 deaths from scarlet fever, 1 death from diphtheria, and 48 deaths from tuberculosis reported. Cases reported: Typhoid fever 426, smallpox 20, measles 28, scarlet fever 66, diphtheria 28, tuberculosis 256.

MINNESOTA—*St. Paul*.—Month of July, 1910. Population, 235,000. Total number of deaths from all causes 222, including typhoid fever 3, scarlet fever 4, diphtheria 14, tuberculosis 24. Cases reported: Smallpox 5, measles 5, scarlet fever 40, diphtheria 122.

Stillwater.—Month of September, 1910. Population, 12,528. Total number of deaths from all causes 6. Cases reported: Typhoid fever 1, smallpox 1, scarlet fever 15, diphtheria 1.

NORTH CAROLINA.—Month of August, 1910. Reports from the state board of health show typhoid fever present in 67 counties, smallpox in 19 counties, measles in 9 counties, scarlet fever in 24 counties, diphtheria in 43 counties, malarial fever in 13 counties, pernicious malarial fever in 7 counties, hemorrhagic malarial fever in 5 counties, pellagra in 2 counties.

OREGON—*Portland*.—Month of August, 1910. Population, 265,000. Total number of deaths from all causes 204, including typhoid fever 8, diphtheria 2, tuberculosis, 18. Cases reported: Typhoid fever 19 (11 cases brought to Portland for treatment), measles 17, scarlet fever 20, tuberculosis, pulmonary, 15.

FOREIGN AND INSULAR.

AUSTRALIA.

SYDNEY—Examination of Rats for Plague Infection.

The following information is taken from bulletins issued by the department of health of New South Wales:

During the month of August, 1910, 5,461 rats were destroyed. Of this number 1,792 were examined for plague infection. No plague-infected rats were found.

The last case of human plague at Sydney was reported May 29, 1909. The last plague-infected rat was found April 4, 1910.

Summary of Rat Examination in 1909.

Consul-General Bray at Sydney reports, August 31:

An official report for the State of New South Wales for the year 1909 shows that 26,744 rats were examined at the bureau of microbiology. Of this number 177 were found to be plague infected. No plague rats were found later than June 19 of that year. Fleas appeared to be most numerous on the rats taken during the first four months of the year, particularly during March and April, comparatively few fleas being found later. A second rise in September in the number of fleas found was accounted for by the receipt of flea-infested rats, all obtained from the same locality; hence the increase is not to be regarded as indicating a second maximum. There was not found a rise such as might have been expected to occur during the warmer months of the year. The most common species of rat flea (*Leomopsylla cheopis*) underwent in March and April an increase out of all proportion with that shown by other species. This increase was coincident with the existence of plague.

AUSTRIA-HUNGARY.

Status of Cholera.

The American ambassador at Vienna reported October 5 to the Department of State:

From September 23 to October 5 there were reported 12 cases of cholera with 5 deaths in Austria and the Austrian crown lands, and in Hungary from September 24 to October 5, 56 cases with 26 deaths.

Consul Šlocum, at Fiume, reported to the Department of State:

October 4, 6 additional cholera-infected districts in Hungary officially reported; October 5, 9 additional infected districts; October 7, 6 additional districts.

TRIESTE—Cholera.

The American consul reported October 16 to the Department of State the occurrence of a case of cholera.

BELGIUM.**ANTWERP—Inspection of Emigrants.**

Consul-General Diedrich reported, October 1, to the Department of State:

The Belgian commissioner of emigration gives the following statement relative to inspection of emigrants for the United States:

All travelers coming from cholera-infected districts on passenger and fast trains are examined at the stations on the frontier of Belgium by physicians appointed for this purpose.

All emigrants are brought to Antwerp by special train and information of their expected arrival is sent by telegram to the sanitary service of emigration at the central station of Antwerp. On leaving the train the emigrants are taken in charge by officers of the service and are conducted to a waiting room where they are examined by a physician. The sanitary service is at work without intermission as long as emigrant trains are coming in. Any aliens showing the slightest suspicious symptom of fever, gastric trouble, etc., are isolated and sent to the hospital for contagious diseases and their companions are kept under close observation in their lodging houses which are daily visited by a physician and an officer of the emigration service specially appointed for the purpose. All emigrants from Russia are held in quarantine five days before embarkation.

Rigorous supervision is exercised over emigrants from Italy and Austria-Hungary. The number of Italians leaving Antwerp is very small. During the month of September, 1910, it amounted to only 8, and these did not come directly from Italy, but had been for some time employed in Germany and Luxemburg.

By ministerial proclamation all vessels arriving from Italy at Belgian ports are placed in quarantine at the station of Doel on the river Scheldt, on the border of Belgium and Holland, 15 miles from Antwerp.

BRAZIL.**PARA—Plague, Smallpox, and Yellow Fever.**

Consul Pickering reported, September 20, to the Department of State:

A case of plague occurred September 19 at this port. The patient was isolated. Smallpox and yellow fever continue present. From July 22 to September 20 there were reported 38 cases of smallpox, with 4 deaths.

FRANCE.**MARSEILLE—Cholera.**

Consul-General Gaulin reports, October 5:

The 2 fatal cases of cholera which were reported October 4 occurred in the persons of immigrants, officially stated to be of Syrian origin, who arrived September 27 on the steamship *Bosphore* from Piræus, Greece. The first case was discovered in an emigrant lodging house. The patient was removed to hospital and died September 30. Another case occurred shortly afterwards, the patient dying in hospital October 2. On October 5 a third case was reported in the same group of persons. All the fellow-passengers of the patients and all contacts were removed to the quarantine station on the island of Frioul.

The lodging house and all hotels at which steerage passengers by the *Bosphore* stopped are isolated and under observation. Sanitary inspection of vessels and passengers is carried out and measures have been taken to prevent pollution of the water supply.

GERMANY.

Cholera.

Ambassador Hill at Berlin reported October 8 to the Department of State:

During the week ended September 25 there were reported at Kalthoff, suburb of Marienburg, West Prussia, 5 cases of cholera with 2 deaths, and during the week ended October 2, 2 cases with 1 death, in the city of Marienburg.

A fatal case of cholera was reported September 22 at Sommerau, near Altfelde, district of Marienburg.

GREAT BRITAIN.

LONDON—Plague on steamships.

The American ambassador reported October 18 to the Department of State the occurrence of a case of plague on the steamship *Oceana* recently arrived in the river Thames from Bombay. The case was in the person of a member of the crew. On October 19 the ambassador reported a second case of plague on the steamship *Hindle* recently arrived in the Thames from Bombay. The second case ended fatally.

HAWAII.

Last case of human plague at Honolulu occurred July 12, 1910.

The last plague-infected rat was found at Aiea, 9 miles from Honolulu, April 12, 1910.

At Hilo the last case of human plague occurred March 23, 1910.

The last plague-infected rat was found at Piihuona, 4 miles from Hilo, April 9, 1910.

Passed Assistant Surgeon Ramus reports, September 26 and October 3:

HONOLULU.

Week ended September 24, 1910.

Total rats and mongoose taken.....	620
Rats trapped.....	591
Mongoose trapped.....	3
Rats found dead (<i>Mus norvegicus</i>).....	1
Rats shot from trees.....	25
Examined bacteriologically.....	534
Plague rats.....	0
Classification of rats trapped:	
<i>Mus alexandrinus</i>	77
<i>Mus musculus</i>	188

<i>Mus rattus</i>	209
Classification of rats shot from trees:	
<i>Mus alexandrinus</i>	8
<i>Mus rattus</i>	15
Average number of traps set daily.....	1,738

Week ended October 1, 1910.

Total rats and mongoose taken.....	688
Rats trapped.....	662
Mongoose trapped.....	25
Rats found dead (<i>Mus rattus</i>).....	1
Examined bacteriologically.....	605
Plague rats.....	0
Classification of rats trapped:	
<i>Mus alexandrinus</i>	119
<i>Mus musculus</i>	208
<i>Mus norvegicus</i>	81
<i>Mus rattus</i>	253
Average number of traps set daily.....	1,738

INDIA.

CALCUTTA—Cholera, Plague, and Smallpox.

Acting Assistant Surgeon Allan reports, September 22:

During the week ended September 3, 10 deaths from cholera, 7 from plague, and 1 death from smallpox were reported in Calcutta; in all Bengal, 95 cases of plague with 85 deaths; in all India, 2,500 cases of plague with 1,770 deaths.

ITALY.

Status of Cholera.

Surgeon Geddings at Naples reports:

Naples, October 17 and 18, 16 cases of cholera with 5 deaths; rest of Italy, 79 cases with 55 deaths. Increase in cases reported is due to appearance of the disease in the hospital for the insane at Anversa.

Naples, October 19 and 20, 11 cases of cholera with 4 deaths; rest of Italy, 47 cases of cholera, with 30 deaths.

Naples, October 21 and 22, 2 cases of cholera; rest of Italy, 13 cases with 15 deaths.

PALERMO—Cholera.

Consul De Soto reports, October 21:

Four cases of cholera at Palermo to-day, 1 case at Girgenti, and 1 at Trapani.

Examination of Emigrants.

Surgeon Geddings at Naples reports, October 4:

Vessels inspected at Palermo, week ended October 1.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of baggage inspected and passed.	Pieces of baggage disinfected.
Sept. 28	Duca d'Aosta.....	New York.....	143	250	50

MEXICO.**Yellow Fever in Campeche.**

The following information dated October 17 was received from the president of the superior board of health of Mexico:

During the week ended October 15 there were reported at Campeche 2 new cases of yellow fever, occurring October 15. Prophylactic measures continue to be carried out.

RUSSIA.**ODESSA—Cholera and Plague.**

Consul Grout reports, October 3:

During the week ended September 30 there were reported 11 new cases of cholera with 9 deaths. At the close of the week there were 13 cases in hospital. From the outbreak of the epidemic to date there have been 594 cases with 332 deaths.

From September 25 to 30, 8 cases of plague with 4 deaths were reported. On October 1 there were 33 cases in hospital. From the outbreak to October 1 there were reported 121 cases with 33 deaths.

TURKEY.**BAGDAD—Cholera.**

The American vice-consul reported October 24 to the Department of State that cholera was prevalent at Bagdad.

VENEZUELA.**CARACAS—Plague.**

The American chargé d'affaires reported, October 20, to the Department of State that a fatal case of plague had been officially reported.

ZANZIBAR.**ZANZIBAR—Smallpox—Examination of Rats.**

Consul Weddell reports, August 31 and September 7 and 14:

From June 8 to September 11 there were reported 135 cases of smallpox, with 63 deaths. The total number of persons vaccinated from June 8 to September 11 was 19,118.

During the three weeks ended September 14, 3,957 rats were received and examined for plague infection. No plague-infected rats were found.

CHOLERA, YELLOW FEVER, PLAGUE, AND SMALLPOX.

Reports Received During Week Ended October 28, 1910.

[These tables include cases and deaths recorded in reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State and from other sources.]
